

Website Tidbits

If you go to the website and don't see something you expect to see, try "refreshing" or "reloading" the page. This is done by clicking on the "refresh" or "reload" icon. Here are examples for Firefox, Chrome and Safari.

The website gets updated often and your Browser (Internet Explorer, Safari, or Chrome, etc) caches; i.e., stores your "favorite" web pages so they load faster. So you may get an old page when you click on a "favorite" button. You may also need to empty the cache on your Browser to prevent this from happening.

You can check at the top of the Home page (or the bottom of other pages) for the "last updated" date for that page

Important announcements will be put on the Home Page in a "pop-up" when you go to the website.

Sometimes, info is "hidden" under a button and if you click or hover over the button, more info will be visible. Many examples are on the Year End Awards Page where info about the Annual Awards luncheon and the Eligibility for the Year End Awards are shown when you hover over those buttons. The other club awards are listed in a "hidden table" where the "highlighted" title, shows the relevant information. Click on a different title for other information.

There are links to entry forms, results, etc on the Home Page as well as on the specific clinic or shows pages.

If you can't find something or you find something in error, please contact me so I can correct it. If you want me to add something to the website, let me know.
